

12 12 11

Precision Insulation Stripper with shaped blades

PATENTED

- shape-adapted stripping also of difficult-to-remove insulating materials made of PTFE, silicone, Radox®, Kapton® and rubber; multi-layer too
- a second pair of blades holds the remaining insulation reliably in place
- Replaceable shaped blade adapted precisely to the respective conductor cross-section
- with length stop for constant stripping length during repetitive work
- Plier body: steel
- Blade: special tool steel, oil-hardened
- for solar cables, specially adapted to multi-layered and RADOX® insulations
- with additional cable support for a better centring of multi-layer insulated conductors in the stripping profiles

Two pairs of blades (1) cut the insulation to a complete extent. Then the blade pairs move apart, and thus the insulation is removed form-fit (2). The plier opens automatically after the stripping procedure.

Neat and precise stripping with an annular cut around the complete insulation. This is particularly important with conductors, which must be stripped precisely.

This works without any problem even with difficult insulating materials made of PTFE, Radox® and multilayer insulations.

Product Number	12 12 11
EAN	4003773062998
Pliers	burnished
Handles	with multi-component grips
Capacity mm²	1,5 - 6,0
AWG	15 - 10
Length mm	195
Net weight g	449

12 12 02 with cable guide and length stop

Precise cutting of the insulation to a complete extent

Positive stripping thanks to precise shape of the blades

automatic stripping of the insulation

technical change and errors excepted

spare parts
