SHOP TOWELS - HUCK TOWELS - T-SHIRT RAGS - SHEETING - TERRY CLOTH

Shop towels and rags come in a variety of materials and lint levels. Cloth rags clean up paint spills, apply stains and varnishes, and polish and dust surfaces. Shop towels are commonly used in garages and maintenance shops to clean oil, engine fluids, and grease from hands and tools. These shop towels are launderable and are made from new materials.

Our new white t-shirt rags are highly absorbent white materials that consist of both smooth jersey, ribbed jersey, and interlock jersey t-shirt rags. These are all new rags and of good quality (nothing recycled).

Recycled or reclaimed cotton rags are a great low-cost alternative for jobs where you don't need premium quality. The recycled material has been previously used and re-washed for re-circulation. The material consists of a combination of smooth jersey, ribbed jersey, and interlock jersey rags. While the absorbency of these rags is not great, it is a good and consistent recycled material. These rags vary in size with a minimum 9" x 9" size. Reclaimed t-shirt rags have a standard lint level and are a great low cost material for painting and staining.
