HUBBELL

As America begins to reopen, businesses will want to create health screening stations either outside or inside their facility. Larger facilities may need a drive through screening operation, while smaller facilities may need a pop-up tent, all needing convenience power. If a mobile generator is available it can feed Hubbell Spider® Distribution boxes with cables protected by Hubbell's TredTrak to provide localized convenience power. Others may need OSHA approved GFCI line cords from an existing receptacle, then provide both 125V AC power outlets and USB charging ports at the point of use in those sites. Regardless of the requirement, Hubbell has the products customers need to provide safe reliable connections.

## Spider® Temporary Power Distribution Boxes

| Rating | Type | Qty | Receptacle Rating | Cat No |
|---|---|---|---|---|
| 50A 120/240V AC (Maximum) | Straight Blade | 6 | 20A, 125V | TPDS |
