

# COLOR-CODED CLEANING TOOLS

## Benefits of Color-Coded Cleaning Tools

Tough Guy color-coded cleaning tools can help promote 5S Lean programs in manufacturing and hygienic zoning in food processing. Hygienic zoning is utilized by food manufacturers, commercial kitchens, restaurants, and grocery stores as one method for preventing cross-contamination. 5S programs are often found in industrial manufacturing facilities to help organize operations.

Made with FDA-compliant materials; Tough Guy color-coded tools are critical for use in the design of SSOPs (Sanitation Standard Operating Procedures) in both food contact & non-food contact areas.

## Why is Color-Coding So Important?

Color-coding in food manufacturing plays an important role in designating work zones, and in turn minimizing potential cross-contamination. Implementing a color-coding program offers a hygiene solution to more effectively control pathogens and allergens.

5S is also an important organizational practice used in general manufacturing. Color-coding can help with all elements of 5S (Sort, Set in Order, Shine, Standardize, and Sustain).

- Available in 5 colors for use in 5S Lean programs and hygienic zoning
- Color-coded brush blocks with matching bristle colors make identification easier
- Made from FDA-compliant materials that are safe for food contact
- Manufactured in TAA-compliant countries and suitable for sales to the U.S. Government\*
