### Specifications and Dimensions

Model	Electrical Cord Storage Length	Dimensions
6YF66	100 feet of 12/3	13" X 10-1/4" X 12-3/8"
	125 feet of 14/3	
	150 feet of 16/3	

### General Safety Information (If electrical cords are used)

1. Failure to comply with the instructions and safety information could result in, fire hazard of unit, fire hazard or electrical shock.

#### **▲ WARNING**

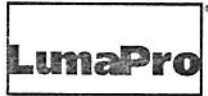

**Potential fatal electric shock hazard! Do not handle an energized fixture or energize any fixture with wet hands or when standing on a wet or damp surface, or in water.**

2. This fixture must be installed in accordance with all electrical and safety codes and ordinances and the most recent National Electric Code (NEC) and the Occupational Safety and Health Act (OSHA). (Refer to Volume 1 on General Industry Standards and Interpretations (OSHA).)
3. All commercial installations should be performed by a qualified electrician.
4. Disconnect power cord before installing or servicing.

#### **▲ WARNING**

**This unit is intended to be used for a general indoor extension cord. It is not intended to be used in potentially dangerous locations such as flammable or explosive atmospheres.**

**Do not use near flammable liquids such as gasoline, turpentine, etc. Always hang plug connections over work. Do not use plug connections within 18" of the floor in garages where flammable gases may collect.**

## Wind Up Storage Reel

### General Safety Information (continued)

#### Electric Extension Cord Instructions

1. Thread plug through large open area on center spool.
2. Pull desired cord length through hollow side of hub to reach nearest outlet.
3. Move the cord into the diamond shaped cord lock before winding.
4. Remove plug from outlet and tuck excess cord into hollow side of hub.
5. Wind wire onto spool guiding it smoothly back and forth to use all spool area.

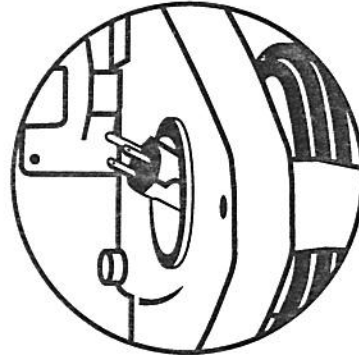

Figure 2 - Thread plug

#### Mounting Bracket Template Instructions

1. Pick desired location near electrical outlet for mounting reel.
2. Position one bracket so that holes align on stud. Attach with provided screws.
3. Place reel in first bracket so that the second bracket location may be determined. Attach with remaining screws. Bracket spacing should allow both to be mounted into studs.
4. Reel can now be hung on the brackets with crank on the left or right, or removed easily for portable use.

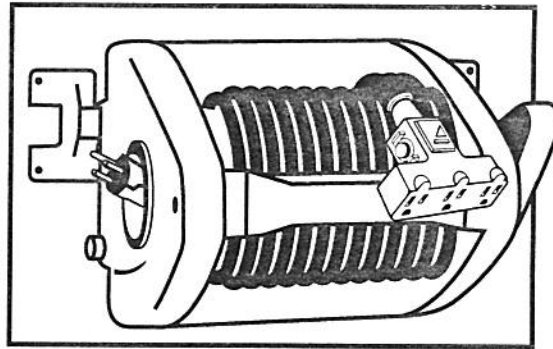

Figure 3 - Mounting

### Operation

Reel cord out to desired length when needed and reel cord back in when work is completed. Unplug from power source when reeling or unreeling electrical cord.

### Maintenance

#### **CAUTION**

*When using an electrical cord be sure all power to the reel and cord are disconnected before cleaning. When using damp cloth, dry thoroughly before reconnecting power.*

#### **WARNING**

*Be sure all power to the reel and cord are disconnected before attempting any service or repair!*

## Wind Up Storage Reel

### Troubleshooting Chart

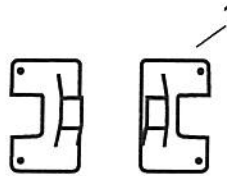

Symptom	Possible Cause	Corrective Action
Reel will not wind	1. Cord reeled up unevenly	1. Wind cord evenly across spool
