Stock Trucks

Designed to hold lugs at a 20° angle for optimal picking. Angled shelves let users see items at the front and back more easily than they could if the items were level.

- Gravity moves items at the back of the shelves forward when items at the front are removed.
- Shelves have a guard rail that prevents items from falling off.
- Bar sides, allow users to see and reposition items on the shelves more easily than mesh sides.
- These trucks are easily customized and accessorized to meet your exact needs.

Container Dollies - Ideal for bulk transporting.

- Accepts standard lugs (16"W x 8½"H x 25"L).

Stack and Nest Containers

Useful for a variety of activities from assembly to production, these containers stack when full and nest when empty. Ideal for use on the conveyor belt or for transport.

NEWAGE INDUSTRIAL

Made in the USA

Platform Trucks Constructed of corrosion-resistant aluminum and are lighter than stainless steel or steel trucks. Decks are low to the ground, minimizing the distance heavy or bulky materials must be lifted when loading and unloading. Narrow deck design allow easy aisle maneuverability. Units carry a **Lifetime Guarantee** against rust and corrosion.
