Designed specifically for shipbuilding and construction industries, the S-Gun 250 Amp MIG Gun Series is built for exceptional performance and comfort in the most demanding environments.

Locked rotatable neck eliminates downtime at start of shift due to missing necks resulting in reduced operator costs

Locked rotatable neck is easily serviceable by maintenance

Steel monocoil power cable is composed of lightweight steel coils that provide an exceptional conduit for shielding gas flow and wire feeding

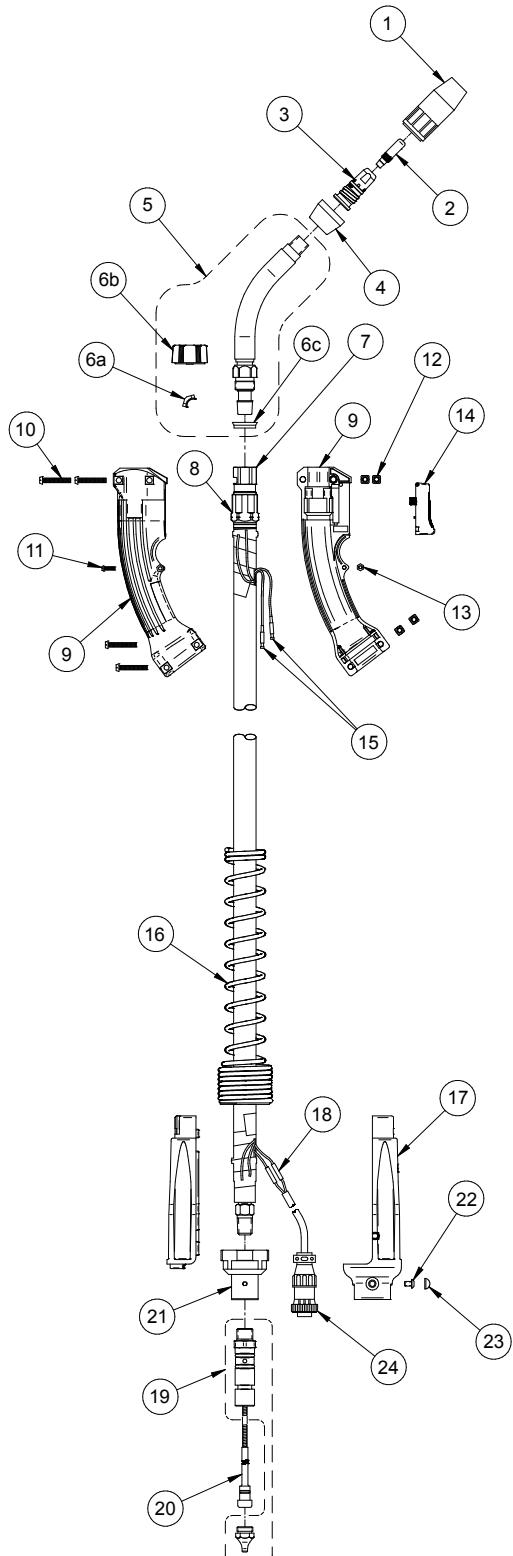

Steel monocoil power cable is engineered to run commonly used wire sizes (.045-1/16 in.) with optimal flexibility and weight

Advanced molded handle design can withstand rough conditions and is ergonomically designed to offer better comfort and control even after extended use

Quik Tip™ Series Consumables are designed with a threaded taper lock that increases tip life by providing excellent heat transfer and electrical conductivity and only takes a quick twist to install
