

Engineering Tool Bag

This highly functional tool bag is the result of a two year partnership with three major hotel and facilities companies with the goal of developing the most functional and efficient engineering tool bag and cart possible. The FlexCart Tool Bag was designed and tested, from the ground up, by facilities engineers. It was built to deliver the exact functionality that an engineer needs in a lightweight and compact design. It is now in service with hundreds of engineering departments around the U.S. Benefits include **increased productivity, inventory control and professionalism of property operations.**

Key Features:

• Lightweight

- Only 15 lbs. fully loaded.
- One of the most valued features by the testing engineers.

• Versatile

- Designed by engineers to have the tools and features needed for most jobs.
- Provides extra space to carry additional items.

• High Quality Tools

- Includes 84 excellent quality tools with brands like Channellock®, Milwaukee® and Mag®.

• Accountable

- Tools are carried in labeled pockets making all of them accountable within seconds.

• Parts Storage

- Includes a 10.75" x 7.5" parts box with dividers for up to 18 storage spaces.
- The parts box is securely carried in a hardened, protective slot in the bottom of the bag.

• Durable

- A thick, hard plastic core with a strong 1600D polyester fabric cover makes the FlexCart Tool Bag uniquely durable and long lasting.

• Stable & Non-Marring

- A wide flat bottom means the FlexCart Tool Bag won't easily tip over.
- Soft rubber, non-marring feet protect surfaces.

• Easy to Carry

- Includes both a flexible handle and shoulder strap for easy transport.

• Patent Pending
