

## Optimize your disinfection efficiency with the KIMTECH® WETTASK® Wiping System

You may be putting enough disinfectant in each bucket, but is your disinfectant maintaining its recommended concentration level? It may not be if you are cleaning with cotton rags or microfiber.

That's because cotton rags or microfiber wipers can soak up and "bind" the disinfectant, so the solution stays in the rag or wiper. KIMTECH® WETTASK® Wipers are specially designed to maintain disinfectant concentration without binding during use and the original, closed-bucket system reduces the risk of cross contamination and exposure to chemical vapors and splashes.

- Use with your preferred disinfecting solution
- Enclosed system to reduce risk of cross contamination
- Guaranteed to reduce your chemical usage by at least 30%

Available in a bucket or small canister

*We help create exceptional healthcare environments by empowering your team with education, engagement tools and solutions.*

BRAND

## Compare KIMTECH® WETTASK® System Wipers with other wiping materials

Test results demonstrate that KIMTECH® WETTASK® Wipers better maintain the target concentration for bleach and quaternary amine disinfectants when compared with microfiber, cotton rags and cellulose-based wipers.

## 60 Days, 30% Chemical Savings Guaranteed

Try the WETTASK® System for 60 days. If you don't see a 30% savings† in your chemical costs, KIMBERLY-CLARK PROFESSIONAL® will reimburse your chemical costs for 60 days with up to \$1,000 in free product per customer facility.

†Savings calculated based on a 60-day chemical cost for an open bucket and cloth rag system as compared to a 60-day WETTASK® System trial chemical cost.

### KIMTECH® WETTASK® System Wipers – Recommended for Disinfecting/Sanitizing

Code	Description	Material	Size	Put-Up	Dispenser
