

PIG® Oil-Only Spaghetti Boom

#BOM204 - 3" x 10' • Absorbs up to 2 gal. per boom • 8 booms

Specially designed to contain and absorb thick oils on water.

- Mesh skin and spaghetti strip filler design is ideal for pulling in thick oil or for use in fast-moving waters
- Tough outer mesh is UV resistant for long-term outdoor use without degradation; lets fluids easily pass through to filler material
- Rope running along length of boom withstands up to 400-lb. loads, adding strength for deployment and retrieval
- Boom floats at surface for easy retrieval, even when saturated
- Absorbs and retains oils and oil-based liquids - including lubricants, fuels and crude oil - without absorbing a drop of water
- Strong, zinc-plated carbon steel attachment clips and rings allow you to link booms together
- Bright white color makes boom easier to see in outdoor environments and clearly shows saturation level
- Can be incinerated after use to reduce waste or for fuels blending
- Note: Not recommended for use on land. PIG Oil-Only Absorbent Booms are recommended for land-based applications

Always in stock. Ships within 24 hours.

ITEM: BOM204 - Pg 1 of 2

BOM204 Specifications

Color:	White
Dimensions:	ext. dia. 3" x 10' L
Fluids Absorbed:	Oil-based Liquids But Not Water
Absorbency:	Up to 16 gal. per bag
Absorbency per:	Up to 2 gal. per boom
Sold as:	8 booms per bag
Weight:	15 lbs.
# per Pallet:	9
Composition:	Skin - Polyester Netting Filler - 100% Polypropylene Clip/Ring - Zinc Plated Carbon Steel
UNSPSC:	47131907

BOM204 Metric Equivalent

Dimensions:	ext. dia. 7.6cm x 3m L
Absorbency:	Up to 60.6 L per bag
Absorbency per:	Up to 7.6 L per boom
Weight:	6.8 kg

Technical Information

Warnings & Restrictions:

There are no known warnings and restrictions for this product.

Regulations and Compliance:

40 CFR 122.26 - When applying for a National Pollutant Discharge Elimination System (NPDES) permit, facilities must have a plan in place that describes actions, procedures, control techniques, management practices and equipment available to prevent illegal discharge of pollutants into waterways.

40 CFR 112.7 - SPCC planning requirements state that facilities subject to these regulations must have written plans in place discussing the products, countermeasures and procedures that are in place, or will be taken by the facility to prevent discharge of oil into waters of the United States.
