WATER-BASED EPOXY MAINTENANCE COATING

S60 SYSTEM

Zero VOCs, zero HAPs, water-based epoxy maintenance coating

Less Prep Time • Easy-to-mix and to apply. Convenient kit packaging available.

Less Application Time • Fast roller, brush or spray application

Less Downtime • No solvent odor perfect for occupied or production spaces. Fast return to service with 30 minute dry to the touch.

Greater Lifetime Value • Long-lasting durable protection that will stand up to frequent washdowns and cleaning.

Typical applications

Walls, equipment, machinery, rails and more in mild to moderate industrial and commercial environments like:

Food and beverage plants • Schools • Healthcare • Warehouses • Food Service
Office Buildings • Prisons • Hotels • and anywhere paint odors or VOC could cause a problem

Tint Bases (Two component system. Use one base unit with one activator unit. Combines to equal one gallon. Must order base and activator separately.) Tinting with some colorants may add minor amounts of VOCs.

Kits (Contains base and activator. Combines to equal one gallon.)

Rails

Walls

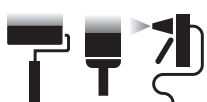

Equipment and more

Companion Products
