

Leviton Lampholders now have official T-Ratings from UL

New ratings apply to all Leviton thermoplastic linear fluorescent and compact fluorescent lampholders.

The T-Rating indicates that fluorescent sockets meet more stringent UL temperature requirements for lampholders.

Leviton is the first lampholder manufacturer to receive official *T-Ratings from UL for its thermoplastic linear fluorescent and compact fluorescent lampholders. Lampholder manufacturers have been marking their products with T-Ratings without recognition or certification by UL. To verify T-Ratings, you can view the UL certification directory online and search by the manufacturer's file number. UL has issued a bulletin to the industry indicating that lampholder manufacturers who mark or advertise their products with a T-Rating and a UL Mark must either remove the T-Rating, situate it in such a way that it is not associated with the UL mark, or have UL conduct an investigation to verify the rating.

Lampholders that do not carry a UL-issued T-Rating are considered by UL to be generically rated maximum 90C. The higher T-Rating allows the lampholder to be used in applications where temperatures higher than 90C may be encountered. Leviton's T-Ratings have been published on the public UL website under our file number E5833, and the actual T-Ratings for our most popular catalog numbers are provided in the following chart.

**T130 Means 130 degrees Celsius*

Catalog Number	T-Rating
13453	130 C
23453	130 C
13654	130 C
23654	130 C
13666	130 C
23666	130 C
13652	130 C
23652	130 C
13653	130 C
23653	130 C
13660	130 C
23660	130 C
13661	130 C
23661	130 C
13662	130 C
23662	130 C
26719	120 C
26720	120 C
26725	120 C
13452	130 C
23453	130 C
13454	130 C
23454	130 C
13455	130 C
23455	130 C
26800	140 C
